

RUSSELL ANGELO PAREDES

1 (204) 451 – 3578 | russpared@gmail.com | Winnipeg, MB

Gameplay Programmer focused on Unreal Engine development with experience building camera systems, hazards, gameplay mechanics, and QA testing. Strong foundation in C++, Blueprints, and systems design with a passion for responsive player experiences and polished gameplay. Seeking to contribute to a collaborative game development team.

TECHNICAL SKILLS

Tools

- Unity
- Unreal Engine

Languages

- C++
- C#
- Java
- JavaScript

Strengths

- Debugging
- QA Testing
- Systems Prototyping

EDUCATION

Advanced Diploma in Game Development – Programming

[2026]

Red River College Polytechnic

- Unreal Engine, gameplay programming, team production pipelines, VR development

Computer Engineering Coursework

[2019-2023]

University of Manitoba

- Engineering mathematics, software development, problem solving

Projects

Ironrise – Gameplay Programmer

Red River College Polytech | Unreal Engine 5 | 4 Months

- Built gameplay systems for a team-developed action platformer vertical slice in a 4-month production cycle
- Implemented third-person camera systems and modular hazards using reusable Unreal Engine 5 Blueprint logic
- Debugged issues and refined features with designers through playtesting feedback

Shipwreck — VR Gameplay Programmer

Red River College Polytech | Unreal Engine 5 | 2 Months

- Developed gameplay systems for a VR target-shooter prototype created during a 2-month team project
- Built target behaviors, spawning logic, and score-driven interactions to support arcade-style gameplay
- Used mathematical equations and interpolation logic to create dynamic, readable movement patterns

Additional Information

Language Proficiency

- English – Fluent
- French – Conversational proficiency, French Immersion graduate
- Tagalog – Strong comprehension; limited speaking ability

Interests

- Trading Card Games (deck construction and strategy theory)
- 3D printing and model design
- Model building

WORK EXPERIENCE

Quality Assurance Tester

[2023-Present]

DAQA

- Tested gameplay mechanics and software systems, helping identify edge cases and gameplay balancing issues
- Identified and documented bugs, providing detailed reports to development teams
- Provided gameplay feedback that improved overall reliability and player experience
- Collaborated with developers to validate fixes and ensure gameplay features functioned as intended

Administrative Operations Assistant

[2022-Present]

UPS

- Managed operational data entry and reporting tasks in a high-volume logistics environment
- Used analytical and problem-solving skills to maintain accuracy and efficiency across multiple workflows
- Demonstrated strong organizational and time management skills while handling multiple responsibilities

Guest Experience Leader

[2019-2022]

McDonald's

- Trained new team members on procedures and customer service practices
- Maintained efficiency and teamwork in a fast-paced environment
